

# WINTER TRAIL USE

This trail network is being groomed for the safety and enjoyment of all user per the Town of Williston. The goal is to create a flat, hard-packed surface that is safer and more enjoyable for all snow travelers. A groomed trail is easily damaged by post-holing or cycling when the surface is soft. Many volunteer hours go into grooming/preparing the surface.

Please respect the guidelines listed below.

Cyclists, if you are sinking deeper than 1 inch depth, we ask you that you stay off the trails.  
Hikers, if you are creating bootprints deeper than 1 inch, we ask that you either hike the hikers only Mud Pond trails or stay to the side of the groomed surface.

Snowshoers and skiers do not harm the groomed track, so have at it regardless of conditions.

*We hope you enjoy the results. Thank you for respecting the groom.*

## Soft Conditions

**SINKING BELOW 1 INCH?**

**Cyclists:**

Please do not ride.

**Hikers:**

Please do not hike.

*(or hike the hikers-only trail next to the parking lot)*

## Firm Conditions

**Cyclists:**

Fill your tires to 2-8 psi before riding.

**Hikers:**

Check your depth before proceeding.

## All Conditions

**Skiers and Snowshoers:**

Have at it!
